

Keystone owners now may choose from four gravel types

In April of 2008, the board of directors approved the replacement of gravel in our common areas, and the removal of overgrown or dead plants. Our contractor informed us that there was not enough gravel for the entire project, in either of the three gravel choices previously approved for private lots, so the board chose a fourth type: Cherokee Sunset. This latter choice was also more economical than others available.

As a result, Keystone homeowners wishing to replace or replenish existing gravel on their lots may choose between all four types:

- Cherokee Sunset
- Aztec Brown
- Table Mesa Brown
- Table Mesa Gold

Before buying or placing gravel on your lot however, please take a few minutes to complete and submit an architectural request form (you may download one from the designated link on this page). *Thank you!*
