## President's Message

Hello, Community Members and Friends,

Next month will be the last month that the "Coalition" will meet for the 2011 year. However, it will be a very busy month. As you know, it will be a month of campaigning by politicians for Mayor, City Council, and other offices.

Since our area is in the new District K, there will be several candidates vying for that City Council position. Let me remind you to attend any forum for these candidates so that you can discover what they stand for and whether they will represent our area well. Remember, we need a candidate who knows our area and who will not pit one part of the district against another part. We expect that all parts of the

district will be treated fairly. We want a candidate who will visit with the community to find out what our problems are and then do something about them: a candidate who will answer our letters, e-mails, and phone calls; and a candidate who will treat us respectfully although we might disagree with him or her.

Since our Central Southwest Super Neighborhood 40 is split between two districts (D & K), we want a candidate who will work fairly with both districts.

**Herman Walker, Southwest Manor-President**

Willomine Way @ San Teresa

## Upcoming Events

October 4—National Night Out

Neighborhood Block Party, 6:00 to 9:00 PM at 5302 Willomine Way at San Teresa

### Community Projects

Meeting Call to Order

Easement Maintenance

Opening Prayer

Website Development

Last Meeting Minutes

Neighborhood Name Sign

Community Projects

Crime Stoppers Program

Planned Activities for National Night Out

Dues Collection

Meeting Adjourned

Closing Prayer

## Floods, Are You Ready

However, all floods are not alike. Some floods develop slowly, sometimes over a period of days. But flash floods can develop quickly, sometimes in just a few minutes and without any visible signs of rain. Flash floods often have a dangerous wall of roaring water that carries rocks, mud, and other debris and can sweep away most things in its path. Overland flooding occurs outside a defined river or stream, such as when a levee is breached, but still can be destructive. Flooding can also occur when a dam breaks, producing effects similar to flash floods.

Be aware of flood hazards no matter where you live, but especially if you live in a low-lying area, near water or downstream from a dam. Even very small streams, gullies, creeks, culverts, dry streambeds, or low-lying ground that appear harmless in dry weather can flood. Every state is at risk from this hazard.

**" He who really wants to do something finds a way: the other man finds an excuse"**
