

1ST AVE. BRIDGE over CHERRY CREEK

Project Information

PROJECT OVERVIEW

In September of 2011, ABCO Contracting began the repairs of the 1st Avenue bridge over Cherry Creek. The bridge is located near the intersection of 1st Avenue and Downing. This project will improve the overall condition of the bridge, repave the road on the bridge and improve the sight distance and safety of the trail beneath it.

DETOUR AND BUS STOP LOCATIONS

The bike and pedestrian trail around the construction zone will be closed through March 2012 with a detour route in place.

To support bus travelers, RTD has adjusted bus stop locations around the construction zone to include 1st and Downing and 1st and Gilpin.

Please use caution when crossing 1st Avenue and pay close attention to the traffic signals using the crosswalks along the detour.

PROJECT DURATION

All work is weather dependent. The project is scheduled for completion in March of 2012. Work can be expected from 7am – 7pm; (normally) Monday through Friday.
