

HELP

My Transponder Doesn't Work

Below is info on replacing the batteries in the transponders. Some people have had luck with it and many others have not. Therefore, I don't recommend it. You can try it or you can purchase a new one from Carlos at the front gate for \$65.00.

Vizcaya Transponders carry an internal battery that is welded to the board of the transmitter; these are replaceable, and it will cost you \$9.99 at BATTERIES PLUS on Orange Blossom Trail.

If you have any problems on this, contact the store owner Dave Kozlowski at dave.kozlowski@batteriesplus.net

You can also reach him via phone, but best practice is to go there. They do check the transponder for working status and replace batteries;

Contact Dave...at 9251 S. Orange Blossom Trail 407.816.7001

Good Luck.
