

Before

After

What we've been up to

As the first days of summer approach, the HOA Board got busy sprucing up the subdivision. The frontage fence got a nice facelift. After years of water damage from the irrigation system, [Tornado Power Cleaning](#), a local contractor, was hired to power wash and stain our exterior fencing. Our landscapers have adjusted the irrigation system to minimize future damage.

We also upgraded our stop signs, which were faded and posed a night safety hazard having lost much of their reflectivity. All 10 signs were replaced by the AMS maintenance team. We hope to either paint or replace the sign posts to make them uniform.

If you have ideas or suggestions about what our next steps should be, please let us know.
