**Subject:** Barracuda Networks Parking Lot

Here are is a summary of the matters Barracuda needs to address to be in compliance with its approved permits:

1. Replace wood with masonry to match the existing wall along Walnut Dr.
2. Come to an Agreement with the property owner regarding landscaping on their private sliver of land that is located between the two parking lots.
3. Restore the wall to match the existing wall that was removed between the two parking lots.
4. Reduce the pedestrian access path to be seven feet wide per the approved plans.

There are now attorneys involved as Barracuda Networks has retained council and the City
