**Robert Rhinehart (423) 645-1154**

Brayden is 8.5 years old & attends Stone Creek Elementary. He and his mother are members of Linwood Baptist church. He is one of the sweetest little boys you'll ever meet. He would love to meet you all on Benefit day.

Brayden has a Chromosome abnormality called 4q33 deletion with an addition of 1p. This is the **ONLY** case **EVER** reported in the world, so rare that they don't even have a name for this syndrome. He is needing a major jaw extraction surgery to hopefully get rid of the tracheotomy to help better his life. The special referral doctors & surgeons for this procedure are in Utah. His mom Ashlyn is a single parent with 2 children. It is impossible for her to come up with money for plane tickets, car rental, food & other expenses. But with the help of everyone pulling together around this family it may can be done.
